Data sources: 1949: C. F. Hickling, *The Fisheries of the British West Indies: Report on a Visit in 1949*, Development and Welfare in the West Indies, Bulletin 29 (Bridgetown, Barbados: Cole's Printery, 1950); 1962–1974: David K. Caldwell and Melba C. Caldwell, "Dolphin and Small Whale Fisheries of the Caribbean and West Indies: Occurrence, History, and Catch Statistics—with Special Reference to the Lesser Antillean Island of St. Vincent," *Journal of the Fisheries Research Board of Canada* 32, no. 7 (1975): 1105–1110. Note that Caldwell and Caldwell estimated the number of "other dolphins" taken during their study period; thus the records of 200 per year for this time span should be viewed as an approximation; 1975–1983: William S. Price, "Whaling in the Caribbean: Historical Perspective and Update," *Report of the International Whaling Commission* 35 (1985): 413–420; 1990–1991: Nigel M. Scott, "The Current Status and Management Options for the Mammalian Fishery in Barrouallie, St. Vincent, West Indies," MS thesis, University of the West Indies, 1995; 2007–2017: An estimation extrapolated from the catch records kept by Samuel Hazelwood. Blank cells indicate missing data.
